

Phase 4 Project

Online Test Application - About

M.Ramakrishna

DESCRIPTION

The Online Test Application system creates an application that enables users to provide online tests, review them, and display the results.

System Details

This system contains three main modules: Quiz, Review, and Result. The quiz section of the online test application accepts the questions in JSON format. The JSON file can be easily shared from the server in the pre-defined format. The application renders the test at the client-side.

The “Review and display result” section allows users to declare the results immediately. You can simply call another JSON with the answers in it and evaluate and display the results immediately.

- This project was generated with [Angular CLI](#) version 12.2.11.
- Run `ng serve` for a dev server. Navigate to `http://localhost:4200/`. The app will automatically reload if you change any of the source files.
- Run `ng build` to build the project. The build artifacts will be stored in the `dist/` directory.

Technologies Used

VS Code (as Editor), HTML5, CSS, Bootstrap, Angular, JSON, Typescript.
